1. Introduction

We provide the following set of guidelines to assist you in successfully completing your Master of Applied Geography (MAG) degree at New Mexico State University (NMSU). Read these carefully and clarify any questions with Dr. Carol Campbell, Head of the NMSU Department of Geography (hereinafter referred to as Department), or Dr. Michaela Buenemann, Department Graduate Program Director. We also suggest that you consult the Department’s Graduate Program webpages as well as the webpages of the NMSU Graduate School (hereinafter referred to as Graduate School).

2. Program Overview

We offer graduate study leading to a Master of Applied Geography (MAG) using Thesis and Residency Options as well as a Graduate Minor in Geographic Information Science and Technology (GIS&T). Our graduate program emphasizes specialized, independent, and applied scholarship built on a solid foundation of general geographic knowledge and skills.

We will work closely with you to accommodate your unique needs and career goals and to help you acquire the skills and knowledge necessary to navigate an interconnected and diverse world. We accept and encourage diversity, including and not limited to diversity of geography, age, disability, gender identity, national origin, race/ethnicity, religious beliefs, sexual orientation, and social or economic class.

3. Degree Options, Courses, and Grade Requirements

3.1 Undergraduate Preparation

While an undergraduate degree in geography is not required of our graduate students, you are required to have fundamental knowledge and skills in physical geography, human geography, and cartography. More specifically, you are required to have completed the following NMSU undergraduate courses or their equivalents:

- GEOG 111G, Geography of the Natural Environment
- GEOG 120G, Culture and Environment
- GEOG 281, Map Use and Analysis

If you who do not satisfy one or more of these course prerequisites, you must clear the corresponding course deficiencies within the first year of enrollment as a geography graduate student.
3.2 MAG Thesis Option

Students seeking a thesis-based MAG degree will complete a thesis project, write a thesis that is approved by the student's graduate thesis committee, and successfully defend their thesis in an oral examination. To fulfill the MAG thesis requirement, ensure that you 1) follow all policies and procedures established by the Department and Graduate School and 2) meet the demands of all thesis committee members. Examples of past MAG Thesis titles are available online.

In addition to the master’s thesis and thesis defense, MAG Thesis candidates are required to complete a minimum of 30 graduate credits, including 6 Master’s Thesis credits (GEOG 599) and at least 15 credits from courses numbered 500 and above. No more than 9 credits of the minimum 30 may be earned outside of the Department. All candidates are moreover required to maintain an overall GPA or 3.00 or higher. Finally, all candidates must earn a grade of B- or better in the following required geography graduate courses:

- GEOG 501, Research Design and History of Geographic Thought
- GEOG 585, Advanced Spatial Analysis
- One Grad-Level GIS&T course either prior to entering the program or before graduation.

Note: In addition to the core geography graduate courses listed above and courses you wish to take as electives, your thesis committee may ask you to make up deficiencies in additional areas (e.g., statistics or database management) of critical relevance to your successful thesis completion.

For more information regarding the MAG Thesis Option, please see Section 4 of this document.

3.3 MAG Residency Option

Students seeking a residency-based MAG degree will complete a residency project, write a residency report that is approved by both the student's sponsor and graduate residency committee, and successfully pass an oral exam. To fulfill the MAG residency requirement, ensure that you 1) follow all policies and procedures established by the Department and Graduate School 2) submit the Graduate Residency Form prior to beginning the project, and 3) meet the demands of both the sponsor and all residency committee members. Examples of past MAG Residency titles are available online.

In addition to the residency report and oral exam, MAG Residency candidates are required to complete a minimum of 36 graduate credits, including 3 Residency credits (GEOG 596) and at least 15 credits from courses numbered 500 and above. No more than 9 credits of the minimum 30 may be earned outside of the Department. All candidates are moreover required to maintain an overall GPA or 3.00 or higher. Finally, all candidates must earn a grade of B- or better in the following required geography graduate courses:
• GEOG 501, Research Design and History of Geographic Thought
• GEOG 585, Advanced Spatial Analysis
• One Grad-Level GIS&T course either prior to entering the program or before graduation

Note: In addition to the core geography graduate courses listed above and courses you wish to take as electives, your residency committee may ask you to make up deficiencies in additional areas (e.g., statistics or database management) of critical relevance to your successful residency completion.

3.4 Graduate Minor in Geographic Information Science and Technology (GIS&T)
The GIS&T Minor is available for all interested graduate students at New Mexico State University, regardless of major.

4. MAG Thesis Option

4.1 Timeline and Milestones
The following timeline is a guide within which MAG Thesis Option students should be working. We realize that you may deviate from this timeline due to various factors beyond your control, but we expect that you diligently attempt to meet the milestones set below. Evaluation of whether or not you are making adequate progress on the thesis research depends upon the degree to which you are meeting these milestones.

### 4.2 Selection of MAG Thesis Advisor and Committee

Success in the graduate program is greatly enhanced by a timely and logical selection of both a Thesis Advisor, who will serve as the Chair of the Thesis Committee, as well as additional Thesis Committee Members.

#### 4.2.1 Thesis Advisor

You are required to select a Thesis Advisor by the end of the first semester in the program. Selecting a Thesis Advisor (and subsequent Thesis Committee Members) is an important process that should be carefully and thoughtfully undertaken. The Thesis Advisor must be the Geography faculty member that is best able to competently advise you on your research. This person is fundamentally a mentor of scholarship and should be selected accordingly. Traditionally, the selection of the Thesis Advisor involves a face-to-face request by the master’s candidate, followed by the student and chair signing and filing the [Thesis Committee Form](#).

The advisor-advisee relationship is similar to any other professional relationship, and clear communication concerning expectations, responsibilities, and obligations is key. The role of the Thesis Advisor is to direct the thesis research. If you require clarification of general expectations, responsibilities, and obligations, or direction on specific technical issues, you should consult directly and promptly with the Thesis Advisor. If
these discussions do not clarify the issues, you need to discuss the matter further with the Department Graduate Program Director. If the issue still cannot be resolved, you should contact the Department Head. Our preference is that these issues are resolved at the departmental level, but if you are not able to resolve issues at this level, an appeals process exists within the Graduate School; details on this are provided in the Regulation and Procedures section of the NMSU Graduate Catalog.

4.2.2 Thesis Committee

Once the Thesis Advisor is established, you will work closely with this person to form a Thesis Committee, which consists, at a minimum, of the Thesis Advisor as Thesis Committee Chair, one other Geography faculty member, and an outside member that also acts as the Dean of the Graduate School’s Representative. Identification of the full thesis committee membership must be completed by the end of the second semester and formalized by filing of the Thesis Committee Form. Selection of thesis committee members should be based on guidance from the Thesis Advisor, with the intention of developing the best thesis committee possible to guide your research. The Dean’s Representative will read and critique the thesis, participate in the thesis defense, ensure that all policies and procedures are followed.

Additional thesis committee members may also be added if needed. For example, one of the thesis committee members can be from outside the university in certain circumstances, but you must consult with the Thesis Advisor before asking anyone else to serve on the Thesis Committee. These outside members must also be approved by the Graduate Dean as Graduate Faculty. This process requires a formal request by the Department Head to the Graduate Dean. This must happen as the thesis committee is initially formed, not at the time of the defense planning. Once you have asked faculty to serve on the thesis committee and received affirmative responses, everyone’s signature must appear on the Thesis Committee Form. On occasion, circumstances arise where a student and/or Thesis Advisor can no longer work together. If a Thesis Advisor or Committee Member must be changed, you must file an updated version of the Thesis Committee Form with new signatures. Any changes in the Thesis Committee must be preceded by consultation with the Thesis Advisor and the Department Graduate Program Director.

4.3 MAG Thesis Proposal

The Thesis Advisor and Committee guide the specifics of your research approach and strategy. However, you must first develop, refine, and base the research on a formal, written thesis proposal, which must be approved by the Thesis Committee. The goal of Geography 501 - Research Design and History of Geographic Thought is to aid students in developing such a proposal. We strongly urge you to use this class, in conjunction with your Thesis Advisor’s input, to develop a logical and defendable research proposal that will further guide your thesis research. Once your thesis proposal is completed,
you will present it to your Thesis Committee. Once all Thesis Committee Members approve your proposed research, you need to file the Graduate Thesis Proposal Form.

4.4 Completion and Defense of the Thesis

As you near completion of the research and the final defense of the thesis, it is important that there is close coordination with the Thesis Advisor. Several important milestones of this process are detailed below.

4.4.1 Prior to the Defense

It is your responsibility to be sure that the Masters Final Examination Form for scheduling this examination is submitted to the Graduate School at least ten working days prior to the proposed date for the examination. Follow the schedule provided by the Graduate School. This form also acts as the formal paperwork in support of your Thesis Committee. All graduate forms can be accessed here.

You will present the results of the thesis in a public seminar. Once you have scheduled an agreed date and time amongst all of the Thesis Committee Members, the defense date, time, and location must be advertised in a flyer posted by you and the Thesis Advisor throughout the Department and distributed to the faculty.

Completion and distribution of the final draft of the thesis document to the Thesis Committee prior to the defense is solely your responsibility. You must ensure that each Thesis Committee Member receives a hard copy (unless specified to be digital by a Thesis Committee Member) of the final draft of the thesis no later than ten working days before the date of the final examination. The format of the thesis must comply with the NMSU Thesis and Dissertation Guidelines. These guidelines also contain detailed information on the thesis approval process and binding. You must also file an Application for Degree (Diploma).

According to Graduate School policy, your Thesis Committee is wholly responsible for the content of the thesis. The thesis editor/reviewer in the Graduate School is responsible solely for formatting issues.

4.4.2 Thesis Defense and Final Oral Examination

Your graduate degree will culminate with a final oral examination, which consists of a public presentation of your thesis and a closed-door defense of your thesis and general questioning by the Thesis Committee. All Thesis Committee Members must be present for the examination, which reflects not only on your accomplishments but also on the quality of the MAG program. It is thus a critical component of your graduate experience.
4.4.3 Thesis Submission to the Graduate School and Department

The final thesis document must meet the required NMSU Thesis and Dissertation Guidelines and be approved by your Thesis Advisor. Submission of the final approved thesis to the NMSU Library is solely your responsibility. You must also submit hardcopy and PDF versions of your final thesis to the Department, along with all of the data and metadata used in the thesis research.

5. Information for Graduate Assistants

5.1 Assistantship-Related Policies and Procedures

The granting of either a Teaching Assistantship (TA) and or a Research Assistantship (RA) is based on the applicant’s qualifications, departmental needs, and available resources. The Department’s intent is to provide four semesters of funding to graduate students in the Department, subject to funding availability. The allocation of a TA or RA is based primarily on departmental teaching or research project needs, not on a student’s desire for the type of work they wish to do. Continuation of funding is contingent upon students adequately fulfilling their TA or RA duties, making adequate progress in their coursework (i.e., maintaining a 3.0 grade point average, passing GEOG 501 and 585 with grades of B- or better, and completing 9 credit hours per semester), and making sufficient progress on thesis/residency research (as defined by the Thesis/Residency Committee). The Department will withdraw funding if these criteria are not met. Students working as TAs are primarily responsible to the faculty member with whom they are working. Students working as RAs are primarily responsible to the faculty member who is funding the research on which the students are working. In either case, the supervising faculty member evaluates whether or not the TA or RA is adequately fulfilling assigned duties. For NMSU graduate assistant policies and procedures, please refer to the Graduate Assistant Handbook.

5.2 Application Process for Departmental Funding

To apply for assistantships from the Department please clearly indicate your interest in financial support in both your application letter and online application form. The priority date for review of requests for financial support is 15 January for fall applications and 15 August for spring applications. Funding requests submitted after these dates will be considered only if the Department has not yet allocated all of its TA or RA lines. If you are not already a MAG student and would like to be considered for funding through the Department, your program application must also be submitted by 15 January and 15 August for fall and spring applications, respectively. More detailed information regarding Geography Graduate Assistantships can be found here.
Graduate students may apply for need-based loans and work-study awards through [NMSU Financial Aid and Scholarship Services](#).

Fellowships and grants are intended to support highly qualified students during their graduate program. At NMSU, both the Graduate School and the different colleges offer a series of awards, assistantships, and fellowships. External funding is also available, for example, through the [Association of American Geographers (AAG)](#), or via the [NMSU Office of the Vice President for Research](#).

Health Insurance information for NMSU graduate students can be accessed [here](#).

### 6. Academic Performance

The Department Graduate Program Director, in consultation with the Thesis/Residency Committee Advisor, will review your performance at least once a year. A report on the results of this review will be signed by the members of the Thesis/Residency Committee and by you. This report will be filed with the Department. Graduate students have a right to access their educational records and can do so through a written request to the Department Head.

### 7. Integrity and Safety in Research and Creative Activities

Integrity in research and creative activities is based on sound disciplinary practices as well as on a commitment to basic values such as fairness, equity, honesty, and respect. The Department’s expectations for the responsible conduct of research and creative activities of graduate students are the same as those applied throughout NMSU. Violation of those rules are grounds for dismissal from the MAG Graduate Program and NMSU. Information on what is considered research misconduct, dishonesty with respect to grades or academic records and scholarships, and violations of professional standards is available from several sources, including:

- [NMSU Graduate Ethics and Standards](#)
- [NMSU Student Code of Conduct](#)
- [NMSU Research Policies and Procedures](#)
- [NMSU Environmental Health and Safety Office](#)

### 8. FAQs

Answers to [frequently asked questions](#) can be found on the Department’s website.
